Acme IT Security Policy - Section 1: Passwords and Access

Passwords must contain at least 14 characters. This section applies to all permanent employees of Acme Technologies unless stated otherwise.

Passwords must be changed every 90 days. Managers are expected to apply these rules consistently and to document any exception.

After 5 failed login attempts the account is locked for 30 minutes. Questions about this policy should be directed to the Human Resources or IT service desk.

Multi-factor authentication is mandatory for all remote access and for the finance system. This section applies to all permanent employees of Acme Technologies unless stated otherwise.

Acme IT Security Policy - Section 2: Devices and Data

Company laptops must be encrypted with BitLocker or FileVault. This section applies to all permanent employees of Acme Technologies unless stated otherwise.

Lost or stolen devices must be reported to the IT helpdesk within 2 hours. Managers are expected to apply these rules consistently and to document any exception.

USB storage devices are blocked by default and exceptions need written approval from the CISO. Questions about this policy should be directed to the Human Resources or IT service desk.

Customer data may only be stored on the approved cloud platform called SecureVault. This section applies to all permanent employees of Acme Technologies unless stated otherwise.

Acme IT Security Policy - Section 3: Incidents and Training

Suspected phishing emails must be forwarded to security-reports@acme.example. This section applies to all permanent employees of Acme Technologies unless stated otherwise.

Security incidents are graded from P1 (critical) to P4 (low). Managers are expected to apply these rules consistently and to document any exception.

All employees must complete security awareness training every 12 months. Questions about this policy should be directed to the Human Resources or IT service desk.

Data backups are retained for 35 days. This section applies to all permanent employees of Acme Technologies unless stated otherwise.
